

ClimaCheck onsite software, version 6

ClimaCheck offer the globally leading performance analysing solution for air conditioning, refrigeration and heat pump systems.

The **ClimaCheck onsite version 6 PC software** includes:

- Updated platform with increased calculation capacity, enhanced flexibility and visualisation.
- Possibility to add and customise your own graphs and tables with increased Excel compatibility.
- Pressure – enthalpy chart to visualise process.
- Multiple tabs for two and three circuit systems to facilitate more efficient analyses.
- Connection to ClimaCheck *lite* with Bluetooth-sensors.

The **SEI Dashboard** offers all the KPIs for a state-of-the art service protocol and the graphs ensures that all controls are operating correctly.

ClimaCheck onsite gives you the optimal tool for a detailed performance report of total efficiency and sub efficiencies for cycle, compressor, evaporator and condenser and all service parameters.

ClimaCheck onsite software can be used with ClimaCheck hardware but also with third party data in Excel format and several other data sources. ClimaCheck offer special license solutions for schools/training centers (please contact us for information on prices and eligibility).
